Clinch Valley Medical Center shares in the belief that the health and safety of employees in the workplace has become an ever-increasing concern for employers. Relating directly to the success of business and industry in our service area, our goal is to partner with employers to protect their most valuable asset: their employees. To accomplish this, we have combined a comprehensive array of services totally dedicated to Industrial Medicine while continuing our efforts to provide truly patient-centered care.

What is an Industrial Medicine Program?
An Industrial Medicine Program provides high-quality medical services that are designed to ensure a healthy workforce, including:

- DOT/Non-DOT Drug & Alcohol Testing
- DOT Physical Exams
- EKG’s
- Full Laboratory & Radiology Services
- Hearing and Basic Vision Evaluations
- Medical Screening & Surveillance Programs
- On-site Health Fairs
- On-site Vaccination Programs (Flu, Hepatitis B, etc.)
- Pre-employment Screenings
- Pulmonary Function Tests
